The youth, with their passion and awareness on social issues, are keen to work and inspire others to work towards a healthy and sustainable future. A musical band performance by our students performing several songs was enjoyed. The students from all the departments were supportive towards the participants and council members. They were appreciated for their hard work and the discipline that was maintained throughout the event. The event ended with a small DJ with the crowd.

Film appreciation with Mr.Ashok Rane

In our previous event of film appreciation, we learnt distinct things about films. What is "Film Appreciation"? Why is it important for students coming from mass media? How does it help in learning film? We all want answers to these questions. Let us see what Ashok Rane, an international film critic and our guest for the event, had to say about it:

Interviewer: What is film appreciation according to you and why should students learn it?

Ashok Rane: Film appreciation is important because it helps us understand the cinema minutely and very closely. It is something that tells us more about cultures and sculptures of our country. Students should learn film appreciation so that they know that a film is not just a film but a story of different characters and society. A story of different forms of life, a story of different beings, a story of various parts and arts of culture.

Interviewer: What motivated you to be a part of this field / why this field?

Ashok Rane: I have always been interested in films/cinemas. Since my childhood I have been watching films and listening to the directors and stories. As I quote in marathi "Mala ved naahi aahe, mala cinema pahnyacha shanpana aahe." So, for me cinema has always been something to learn more about every time I watch one.

Interviewer: Which movie you most enjoyed working in?

Ashok Rane: I just directed one movie and eight documentaries, and I must say that I enjoy making each one of them. Every subject brings a challenge and to compete it we need to have preparations. Those preparations are your creativity, so you enjoy making a film/documentary.

Interviewer: What do you think are the trends we have to look out for in national cinema?

Ashok Rane: Indian cinema is changing and now we are more of a realistic cinema and closer to life because we are depicting reality but also making it entertaining. Today's generation looks forward to something interesting and funny.

In conversation with Sonali Kulkarni

Interviewer: Does the aura of the set affect your performance?

Sonali Kulkarni: You have to have your own ways to be aware of the set's aura. Every actor has their own ways to cope up with the negative environment.

Interviewer: How did you get your role in the Italian movie?

Sonali Kulkarni: They first saw my film "Cheluvi" at "Cannes Film Festival", in liking to my performance, they contacted me.

Interviewer: What is your message for the future generations perceiving to be actors?

Sonali Kulkarni: Watch a lot of films, no matter what the language. It will help you in becoming more than just an audience of the film. Read, write and practice as much as you can.

Inflation in India peaking: RBI

Inflation, measured by the consumer price index (CPI), came in at 7.01% in June compared with 7.04% in May and 7.79% in April, still above the MPC's tolerance band.

Numerous indicators suggest that the Indian economy is making tough progress in the first quarter of FY23, in spite of the drag from global spillovers, higher inflation and some break of external demand as geopolitical developments take their toll on world trade, the paper said.

There is a hope as Central bank noted the control of commodity prices, and especially food prices. This suggests that unjust inflation may be peaking.

Movie Buzz

Thor: Love and Thunder

This film is an emotional, romantic, action-packed thrill ride that is also pretty humorous. The last two Thor films, Thor: Ragnarok and this one, are very different from the first two; the latter two are much lighter and, dare we say it, more fun, whereas the former two are darker but no less fantastic. This film features an incredible cast, including Chris Hemsworth and Natalie Portman, among others. Taika Waititi, who also portrays the movie's hilarious and outgoing Corg, is the film's director and is responsible for the film's excellent direction.

Dark Academia:

The Goth aesthetic of art

An aesthetic is the way of artistically pursuing life and appreciating it, thereby making it a lifestyle. Collecting shells and beads and braiding them into your hair is a way of appreciating and indulging in the minute beauty of nature. That was the Boho aesthetic. Like the boho, there are several other styles that people pursue (mostly in modern fashion) like Indie Kid, Grunge, Cottage Core and so on. Among these, there is one for the library/book enthusiasts called the Dark Academia.

The inception and propagation of this aesthetic is attributed to the novel *The Secret History* by Donna Tartt published in 1992. Dark academia is a subculture that traces the aspects of education and languages. This aesthetic revolves around library culture academic achievements poetry and literature. It is widely seen as an aesthetic for introverts. Some Dark Academia enthusiasts may have a keen interest in philosophy and languages such as Greek and Latin as well. Its fashion consists of black, deep brown, sap green and carmine hues while the Light Academia, that is the lighter version of Dark academia aesthetic, is more towards the beige and whiter shade.

The remarks of a Dark Academia enthusiast include aspects such as cluttered rooms, inked books, taste in classical music, visiting museums, libraries and coffee shops.

The term 'aesthetic' might have gained a new meaning these days, however it has always been an artistic way of living and looking towards life. Dark Academia is just one of them that enforces the mysterious and dark art fanatic within you and makes life more picturesque.

CREATE THE LIFE OF YOUR DREAMS!

Our dear bibliomaniacs, have you ever heard of the books 'The Power of Your Subconscious Mind' or 'The Secret'? If yes, well, we have some topics of your interest. Even if it's a no, keep reading further to discover one of the laws of the universe – The Law of Attraction.

What is Law of Attraction?

We've often heard people say 'think positive', 'practice gratitude'. This is somewhat related to the Law of Attraction. Simply put, it is a philosophy that believes in the power that positive thinking holds. It suggests that positive thinking brings about positive changes into a person's life. It is based on the belief that thoughts are energy and positive energy attracts great success in all aspects of one's life.

Principles of the Law of Attraction

The advocates of Law of Attraction like to believe that it follows three basic principles:

1. **Like attracts like:** It suggests that things or people with the same energy/ frequency/ wavelength are attracted towards each other. For example, an individual with self-doubt or insecurities may attract circumstances that might trigger them more, whereas, a person with optimistic view may attract positive outcomes.
2. **Fill the vacuum:** Our mind and life is never empty. It will always occupy thoughts throughout the day. Hence, it is very important to have thoughts that will be fruitful for your growth and abundance. This can be done by keeping a track of your thoughts. Whenever a negative thought comes by, try altering it with something positive.
3. **Be in the present moment:** People are often seen dwelling in the past or day dreaming about their future. While it is necessary to have plans for the future, you cannot spend majority of your day worrying over something that is uncontrollable. Being in the moment means appreciating the present, being grateful for what you have now. As this is exactly where you were supposed to be.

♉ Taurus ♅

Take a good look around the room you're currently in. What feels "off?" Sometimes we try to sweep things that make us uncomfortable under the rug, hoping it fixes themselves later. Give your living quarters a good run down. Stagnant energy is asking to be released.

Instant manifestation is just not in the cards for you this month. The practical rituals you partake in today, tomorrow, and a week from now, are only stepping stones towards something greater. Focus on building up your energy. You can do this!

♋ Cancer ♀

Pay close attention to the direction in which your resources are flowing this month. Plan ahead. Do some sleuthing. There are more machinations behind your money problems than would normally meet the eye, but with a little time, you'll find the truth yourself.

♌ Leo ♌

Celebrate all that makes you who you are this month! It's not always about the big parties or the social media views or whatnot, but this month take the time to celebrate your efforts and the days you motivated yourself to get out there and do your best.

♍ Virgo ♍

Head down and elbows up this month. Check your to-do list morning and night. Take deep breaths before stretching and tackling the day. You need your strength to handle the nonsense of the world. Patience and diligence will help you ride any storms that come your way.

♎ Libra ♎

Practice moderation. There could be many invites to summer parties and social gatherings, which can be really great for you, but there may be a tendency to overdo it, filling you with regret and anguish later. Rubbing elbows is great, but be sensible. Ask questions!

♏ Scorpio ♏

This is your month. Own it. You are a brilliant monarch who walks towards glory and recognition. Build up your energy, bide your time, then expend it all at once in a sprint towards your biggest goal! Go for it. Don't sit on your hands – it's time for action.

♑ Capricorn ♑

Hang in there. It's time to put on a calm demeanor to mask the turbulence within you as you trudge through the swamps. It's not fun. It's not easy. You might be met with situations that test you, scare you, or inspire jealousy or obsession. Write it out.

♒ Aquarius ♒

Other people may be very grating and disappointing this month. They may not argue with you outright, but you may feel unease begin to creep into your relationships. This could be platonic or work-related, not necessarily romantic. Reread your contracts, too.

♓ Pisces ♓

If you have employees, this could be a good month to open up to them. There's potential for relationship building there. You may, and I know this sounds silly, adopt an animal! Take the good with the bad – there's bittersweetness on the horizon. Open up!

SPOT THE DIFFERENCE

DID YOU KNOW?

Monopoly helped POWs escape

During World War II, the Nazis did something un-Nazi-like: They let Allied prisoners of war play board games. The British government was even allowed to send its incarcerated soldiers a game or two. One of the games it sent? Monopoly. Inside the box? Tools for escape. Specifically, the British government, with the cooperation of the game's publisher, hid real bank notes among the Monopoly money. Compasses, metal files, and a folded silk map—which was less likely to disintegrate than a paper one—were also concealed inside the box to help the POWs flee their captors. It worked; the soldiers escaped. You, on the other hand, have probably been playing Monopoly wrong your entire life.
